

Addendum to the Instructions for Contributors – Open Access for JDS

Effective June 1, 2007

Publication Costs: The *Journal of Dairy Science*TM now offers two options for publication of articles: Conventional and Open Access.

Conventional: The current charge for publication is \$85 per printed page in the journal for articles if at least one author is a professional member of ADSA. If no authors are ADSA members, the publication charge is \$140 per journal page. The cost to publish a color figure is \$995 (per figure) plus an offprint surcharge. There is charge for all offprints. An offprint order form will be sent to the corresponding author with the author proof. Conventional pages become freely available to the public 12 months after publication in a journal issue.

Open Access: For authors who wish to publish manuscripts under Open Access, an open access fee of \$1,000 is required in addition to the page charges outlined above. Open access articles will become freely available to the public at the time the journal issue containing the open access article is posted by HighWire Press. Open access articles will be freely accessible through the journal's web site on HighWire (<http://jds.fass.org/>), but author(s) submitting open access articles shall bear sole responsibility for meeting specific posting requirements of their funders. The *Journal of Dairy Science* shall provide the corresponding author with a PDF of the open access article at the time payment is received.
